EDUCATION

VIT-AP University

B.Tech in Computer Science and Business Systems (CSBS)
– CGPA: **8.98 / 10** (Current)

Amaravati, Andhra Pradesh

2023 – 2027

New Horizon College Kasturinagar

Pre-University Course (PCMC – Physics, Chemistry, Math, Computer)
– Grade: **93.16%**

Bengaluru, Karnataka

2021 – 2023

Chinmaya Vidyalaya

SSLC
– Grade: **91.52%**

Bengaluru, Karnataka

2020 – 2021

EXPERIENCE

Data Analytics & AI Intern

June 2026

CDW Technologies India Pvt. Ltd.

- Worked with Microsoft Fabric to perform ETL processes, data integration, and transformation workflows.
- Built interactive Power BI dashboards to visualize business data and deliver actionable insights.
- Developed and evaluated Machine Learning models to solve real-world prediction problems.
- Designed an AI Decision Support Assistant capable of answering questions from documents (RAG), generating SQL queries from natural language, and performing machine learning-based predictions.

TECHNICAL SKILLS

Languages: Python, SQL, C, C++

Data Science & AI: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, EDA, Machine Learning, RAG, Semantic Search, Embeddings

BI & Analytics: Microsoft Power BI, Microsoft Fabric, DAX, ETL, Data Modeling, Dashboard Development

Tools & Technologies: Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Yahoo Finance API

Business & Domain Knowledge: Business Strategy, Corporate Finance & Restructuring, Financial Management, Operations Research

PROJECTS

AI E-Commerce Operations Platform | Python, Streamlit, SQLite, LangChain, XGBoost, Power BI |  Code

- Developed an AI-powered enterprise operations platform unifying Natural Language Database Analytics, RAG, Machine Learning, and Business Intelligence within a single Streamlit application.
- Implemented Natural Language to SQL using the OpenAI Agents SDK and a multi-document RAG pipeline (LangChain, FAISS, HuggingFace Embeddings) for conversational querying and contextual Q&A with source attribution over business and document data.
- Built an XGBoost-based customer membership prediction module and integrated it into a modular tool-calling AI agent that dynamically selects the appropriate capability based on user intent.
- Developed an interactive Power BI dashboard to visualize business KPIs, sales performance, customer insights, product analytics, and operational trends, enabling data-driven decision making.

AI Personal Finance Assistant | Python, RAG, Llama 3, Ollama, Embeddings |  Code

- Designed a Retrieval-Augmented Generation (RAG) system using bge-m3 embeddings and cosine similarity to answer finance-related queries from transcript data.
- Integrated Llama 3 via Ollama across an end-to-end pipeline (preprocessing, chunking, embedding storage, real-time querying) for context-aware, grounded responses.

Portfolio Analytics & Risk Evaluation System | Python, Pandas, Streamlit, Financial Analysis |  Code

- Built an interactive Streamlit dashboard analyzing stock portfolios against NIFTY 50, computing returns, volatility, Sharpe ratio, drawdown, alpha, and diversification score using real-time Yahoo Finance data.
- Added MA20, MA50, and RSI technical indicators with interactive visualizations for deeper trend analysis.
